

MMPK From AGOL Web Map

Create New ArcGIS Pro Project

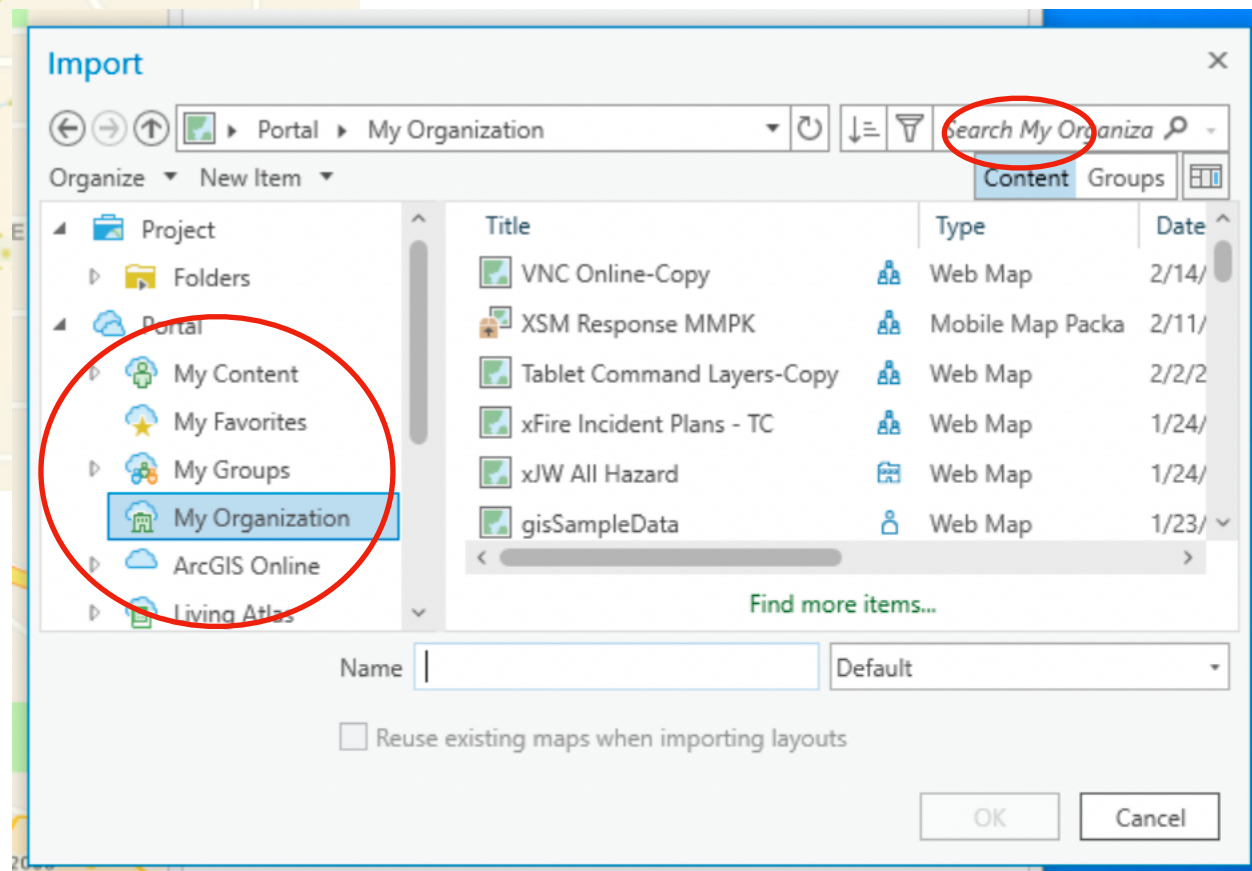

Add Map Data from AGOL Map

On the Insert Tab

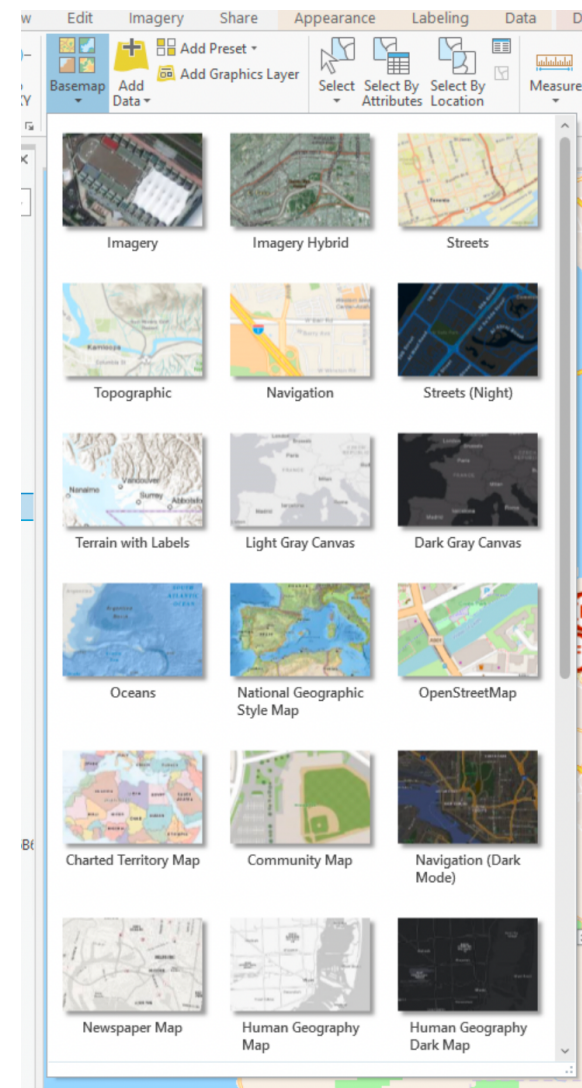

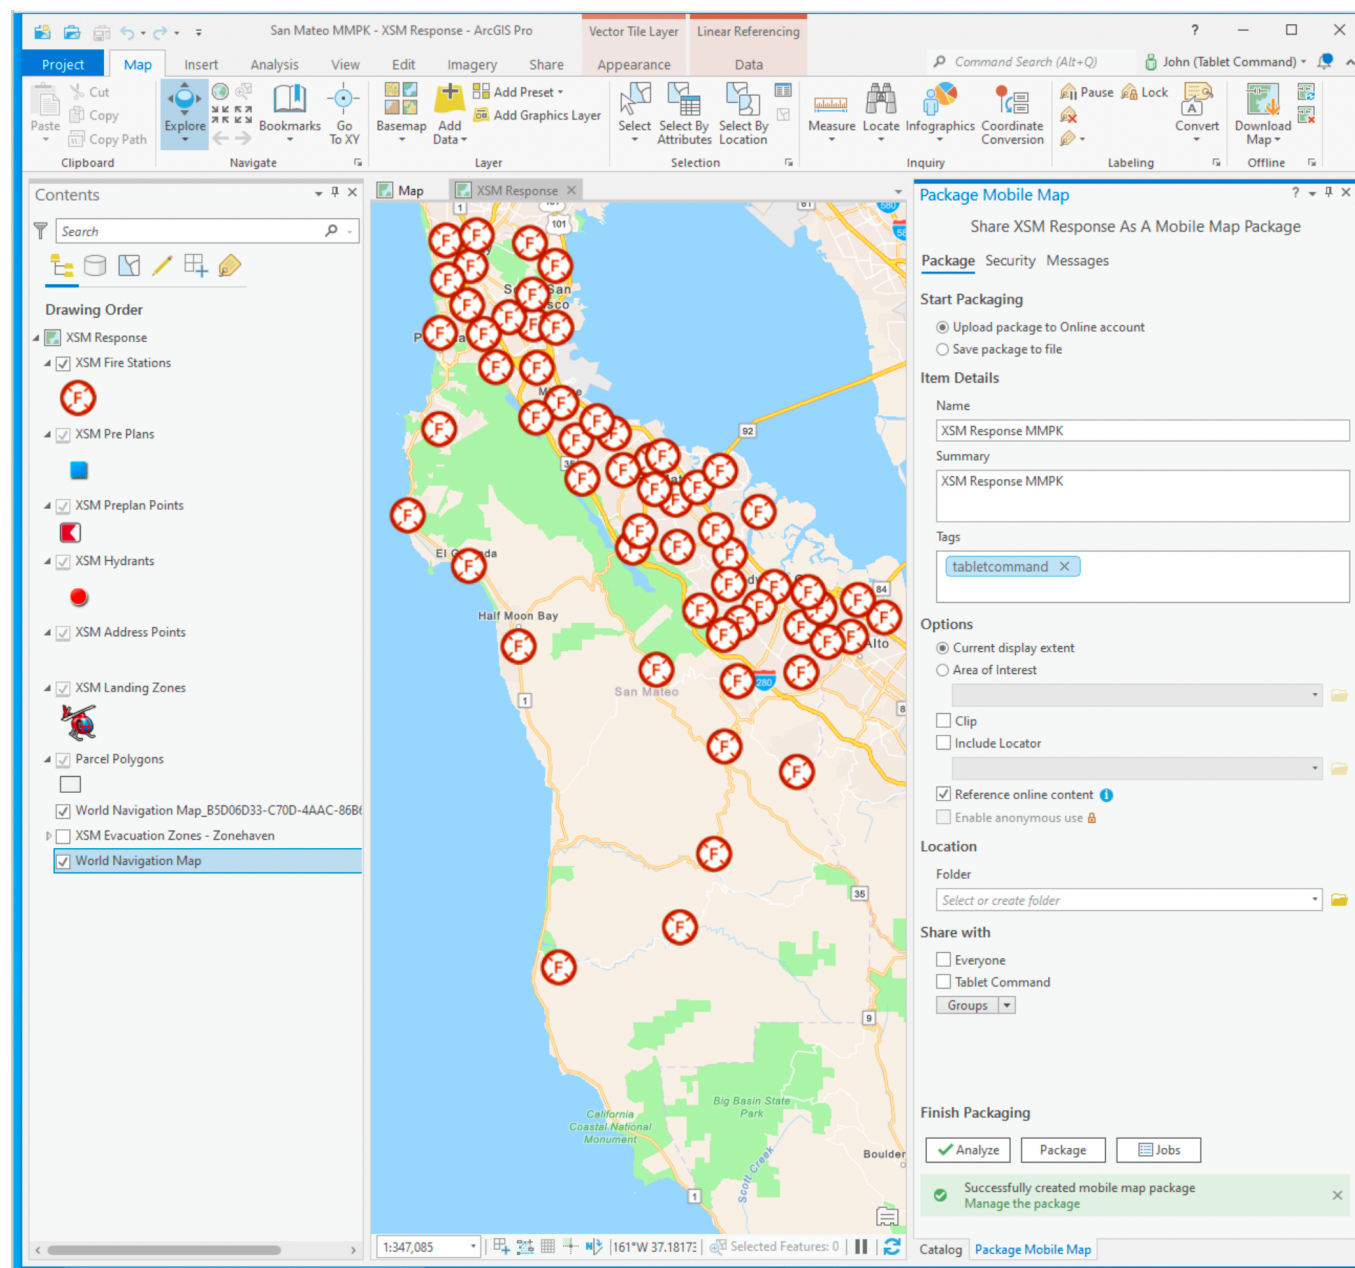

- Click Import Map
- Find the desired web map in the Portal section
- Choose it and click OK

Set Basemap and Desired Extent

Manipulate the zoom and windowsill in ArcGIS Pro to include your desired extent for the offline area.

Choose your desired basemap. This step is necessary even if the web map has the same basemap already

Download the Basemap

The screenshot displays the ArcGIS Pro interface with the 'San Mateo MMPK - XSM Response' project open. The 'Map' tab is active, showing a map of San Mateo with numerous red circular markers labeled 'F'. The 'Contents' pane on the left lists the following layers in drawing order:

- XSM Response
 - XSM Fire Stations
 - XSM Pre Plans
 - XSM Preplan Points
 - XSM Hydrants
 - XSM Address Points
 - XSM Landing Zones
 - Parcel Polygons
 - World Navigation Map_B5D06D33-C70D-4AAC-86B6
 - XSM Evacuation Zones - Zonehaven
 - World Navigation Map

The 'Package Mobile Map' task pane is open on the right, showing the 'Package' tab. The 'Start Packaging' section has 'Upload package to Online account' selected. The 'Item Details' section shows the name 'XSM Response MMPK' and the summary 'XSM Response MMPK'. The 'Options' section has 'Current display extent' selected, and 'Reference online content' is checked. The 'Location' section shows a folder selection dropdown. The 'Share with' section has 'Everyone' selected. The 'Finish Packaging' section shows the 'Package' button. A green notification bar at the bottom states: 'Successfully created mobile map package. Manage the package'.

The 'Download Map' dialog box is open, showing the 'Download Map' button circled in red. The dialog box contains the following text:

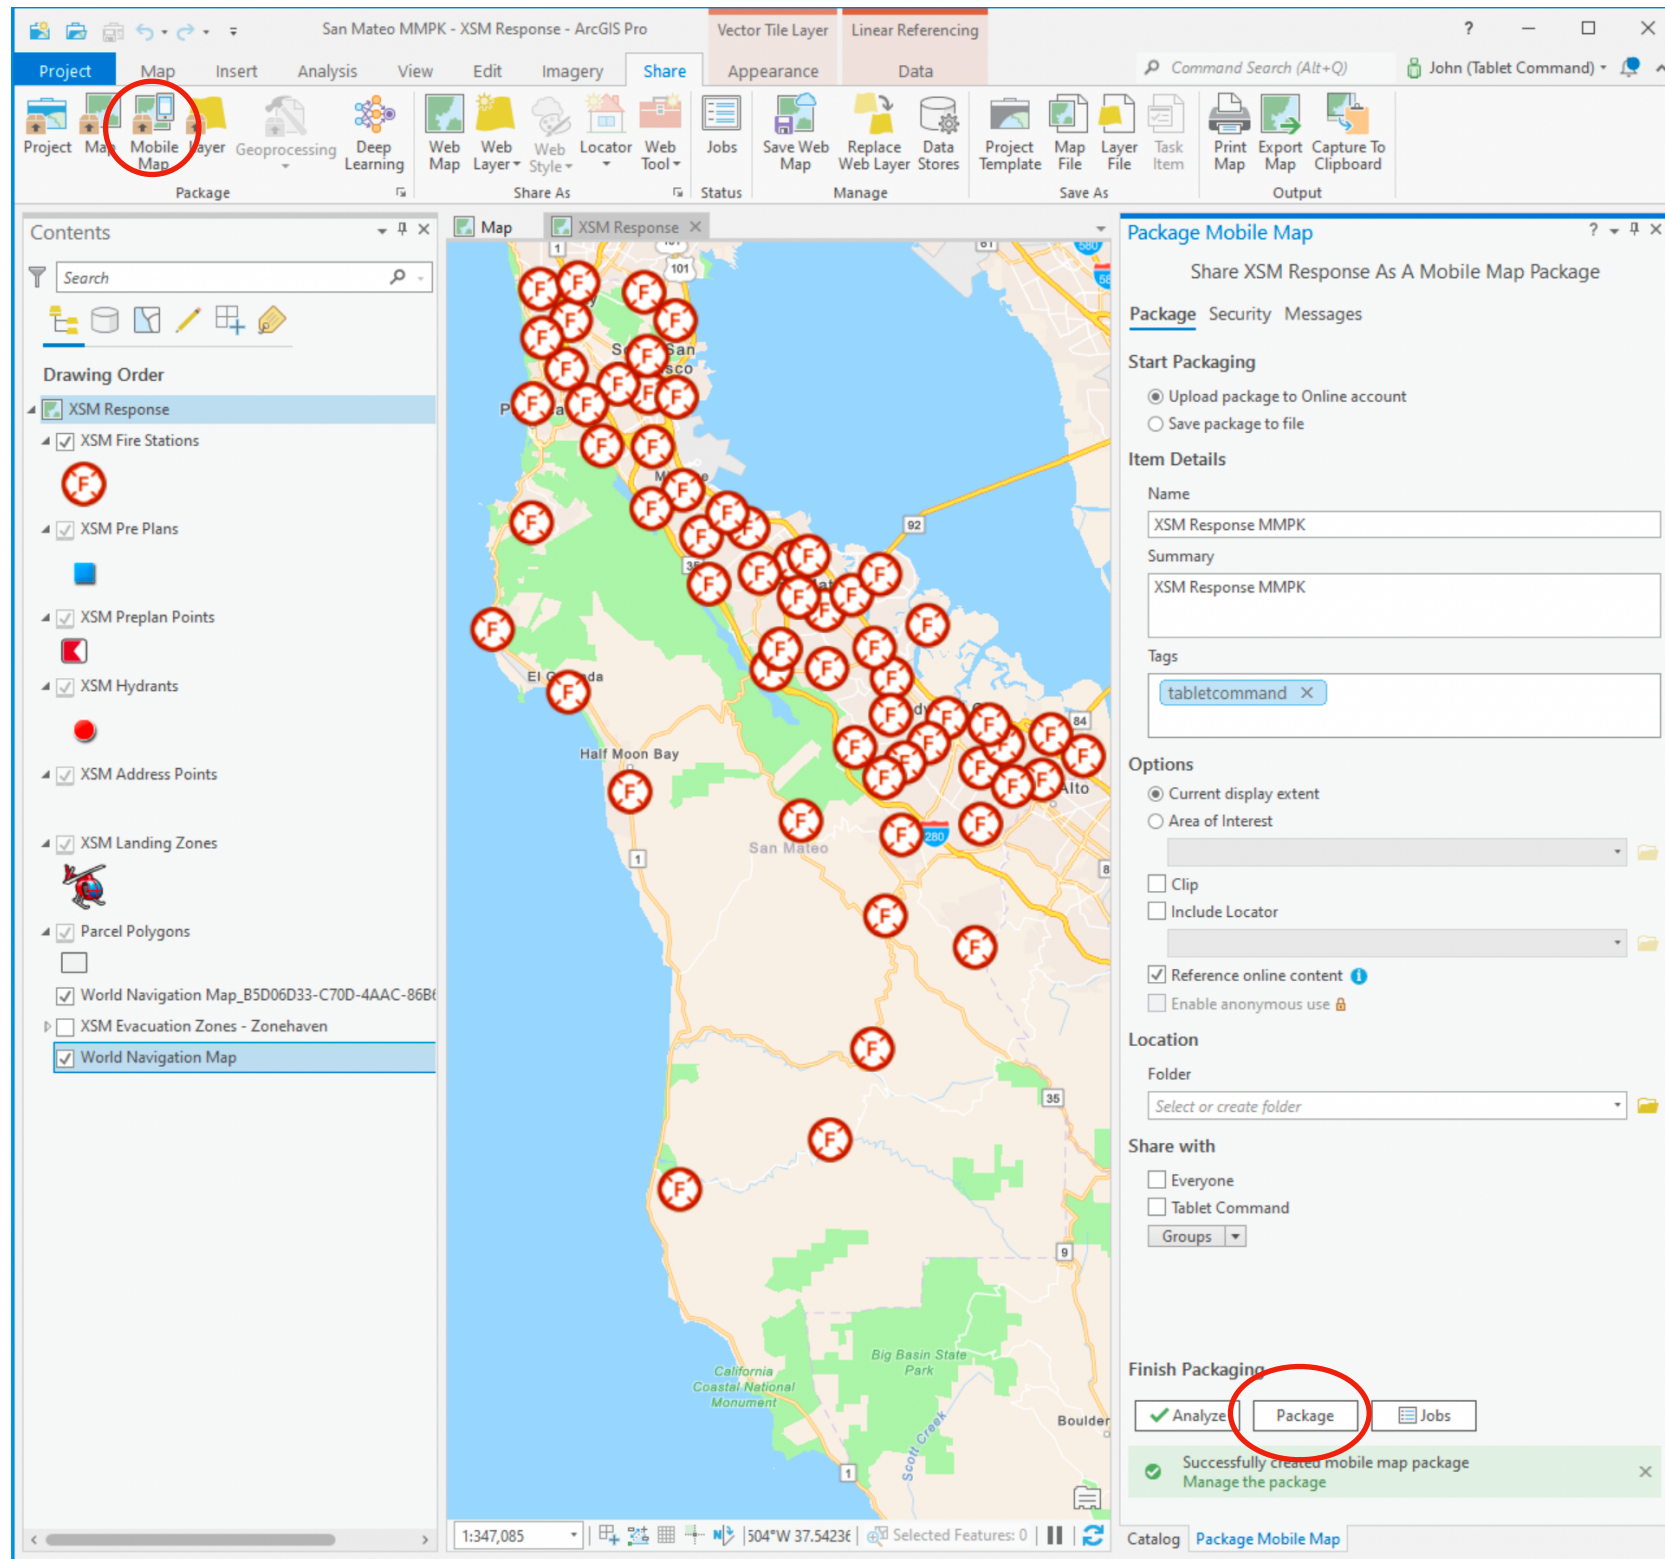

Pan and zoom the map to define the area to download. Download size is determined by map area and max scale.

☒ Include basemap & tile layers

Max scale for vector tile layers 1:283

Download

Upload the MMPK

On the Share tab

- Click Mobile Map
- Set the desired settings
- Click Package

Suggested Settings:

- Upload package to Online account
- Name package with MMPK in it
- You must provide a summary
- Tag with “tabletcommand” so it will be available to Tablet Command users
- Make sure the extent is the same as when the map was downloaded
- Enable Reference online content
- Set desired AGOL folder if any
- Share to the desired groups. Typically this would be the Tablet Command provided group that supports the account
